unithink : Company Profile

❑ History:

In **2001**, clinical experts came together with IT technology specialists using their experience to better serve the industry, providing e-solutions with a clinical approach to pharmaceutical and biotech companies on a “per study customized” basis with “easy to use, fast development engines”.

This allowed us to found the concept of our actual fast and simple technology approach builder, creating an optimal economical **customization** and **user friendly tool**.

❑ **Financially supported** by a corporate investor DOMO Group, an international group with 2,000 people and €1 billion turnover providing **stability, support** and **access to resources**

❑ **Global footprint** with locations in Belgium, US and India

❑ Headcount of **100 people**

❑ > 500 yrs team **experience**

❑ Mission Statement:

unithink[®] will become a **leading player** in the ICT & Life Sciences industry by providing state-of-the-art innovative EDC – electronic data capturing- solutions that embrace all possible aspects of clinical development including the commercial valuation of its molecules

unithink : Product Offering

- ❑ **Clinical ThinkClinical web-based data collection and management systems**
 - ❑ 100% customizable solution (no off-the-shelf SW)
 - ❑ Extremely user friendly interface for all users (CRO/sponsor/physician/patient)
